HOWOWcode and no-*COde* applications are helpful?

FOR BUSINESS, DEVELOPERS, AND QA ENGINEERS..

Fast Pace Development

The entire development is done faster due to the quick initial setup time. These tools combine and facilitate the delivery of multiple basic features quickly.

Better Unit Testing is done

These tools or platforms will undergo extensive unit testing, which makes them efficient and stable.

Enhanced productivity

These tools enhance team productivity by avoiding coding and external library dependencies, allowing minimal resource allocation planning.

Future-proof applications

LC/NC platforms for development have low maintenance needs, allow easy scalability and feature addition/deletion, and are simple to maintain for future adjustments.

Third-party Integrations

The platform has built-in third-party integrations for easy development.

Continuous evolvement

LC/NC tools succeed in the market by providing innovative solutions and evolving based on the insights of industry experts.

Unit testing assistance for developers.

Test automation tools aid developers in performing fast and reliable unit tests.

Easier to use

Most tools are user-friendly and easy to use, with no lengthy learning process.

AI-Powered

LC/NC tools utilize AI to streamline development and enable AI-powered applications.

CI/CD pipelines

They seamlessly integrate with CI/CD pipeline for unified development, deployment, and progress tracking.

Cost Effective

The faster development speeds up the process, saves cost and effort, and accommodates new changes quickly, reducing risks.

Democratization

LC/NC tools democratize development, enabling non-tech users (citizen developers) to create.

Cross-platform support

These tools support various platforms and browsers and allow for easy testing and deployment of applications across different devices.

Experts support the use flow-code/no-code platforms. We must grasp its origins, advantages, and limitations. The lowcode/no-code industry is projected to keep grówing.

"No-code is more of a mindset than specific techniques and practices. It has one objective: find a way to get the most work done and deliver the most value and functionality with the smallest time investment. This mindset is why no-code is relevant to any business and entrepreneur." -Monika Ben, Head of Marketing at involve.me
