Things to unlearn as a Tester

→

Pricilla Bilavendran

Being a people pleaser

→

Holding onto the past

→

Automation is the only efficient way of testing

→

Coding is an essential skill for software testers

→

Lack of planning

→

Procrastination and being lethargical

→

Project knowledge decides your future

→

One-stop solution
for all problems

→

Pessimistic thinking and insecurities

→

Thinking you are alone

→

"Learn to unlearn."
— Benjamin Disraeli.
